FAXI: SIMPLIFYING JOURNEY SHARING WITH OTHERS

FAXI allows people to create or join groups, enabling them to communicate with others who share a similar destination and plan an optimised journey share, by car, bike, public transport, or by foot.

Based around a map showing your journey and the status of other users within your group, you can use the built in messaging system to arrange your journey share. It's that simple.

The FAXI website and smartphone app simplifies journey sharing, and because it works on a 'group' basis, reduces the risk element of sharing with total strangers.

For more information and to watch our promotional video please go to www.faxi.co.uk

THE BENEFITS OF FAXI

- Car share - reduce costs, congestion and carbon emissions
- Safely find walking partners to increase daily exercise
- Start cycling groups
- Meet up and make public transport safer and more social
- Internal messaging enables easy, direct contact between members organising a journey
